

PABLO RIGALLI

SOFTWARE DEVELOPER

I am currently advancing in my career as a software developer, specializing in applications for web and mobile platforms using JavaScript and TypeScript. My focus lies in creating scalable and functional products and architectures that prioritize usability. I bring a strong sense of responsibility and initiative to my work, along with the ability to adapt quickly and learn new technologies in response to business objectives.

EXPERIENCE

SR SOFTWARE DEVELOPER

Acid Labs - United States

Jan 2022 - Present

- I played a key role in the development, architectural design, and maintenance of an e-commerce platform for the client Cencommerce-Cencosud. My contribution spanned from initial conception to the successful deployment of the solution. Additionally, I worked closely with the team throughout all project phases, providing technical support and ensuring consistency and quality of the final product.
- Technologies used: TypeScript, Node.js, React, Nest.js, WMF, Swagger, GraphQL, Git, GitHub Actions.
- Implemented the SCRUM process and utilized tools like JIRA and Figma for efficient project management.

SSR FRONTEND DEVELOPER

Contenidos Digitales - Argentina

Jan. 2021 - Dec. 2021

- As a frontend developer, I collaborated on projects within the real estate and advertising sectors, focusing on creating intuitive and engaging user interfaces for web platforms. I optimized user experience and developed effective advertising websites for prominent clients including Pepsi, Pepsico, and Spotify. These experiences have refined my user-centric approach and ability to design digital solutions that meet the business objectives of internationally recognized clients.
- Technologies used: React, GraphQL, Next.js, TypeScript, CSS modules, Git.
- Collaborated in agile teams following SCRUM methodology, using tools like Trello and Zeplin for effective project management.

SKILLS

- Javascript
- Typescript
- Jira
- Scrum
- React Js
- Next Js
- Nest Js
- GraphQL
- Git
- Github Actions
- AWS
- Figma
- Tailwind CSS
- Jest Js
- Cypress
- Swagger
- Npm package
- WMF

O FRONTEND DEVELOPER

Applica Mobile - Argentina

Jan. 2020 - Jan. 2021

- As a frontend developer, I made significant contributions to the development of software solutions for a web/mobile self-management platform for the client Movistar. Playing a central role in creating an optimal user experience from the client's perspective, this project in the communications industry allowed me to implement intuitive and functional interfaces that significantly enhanced user interaction.
- Technologies used: JavaScript, jQuery, .NET, Bootstrap, Git.
- Worked in a team environment following SCRUM methodology, utilizing Jira for efficient task and delivery management.

O WEB DEVELOPER

Alberione Ingenieria en Sistemas - Argentina

Jan. 2020 - Ago. 2021

- I developed web applications for a platform that integrated facial recognition technology as part of a project addressing COVID-19 challenges. My role involved implementing innovative and secure functionalities to enhance identification and access processes, thereby contributing to technological solutions in the fight against the pandemic
- Technologies used: JavaScript, .Python, Css modules, Git.
- Worked in a team environment following SCRUM methodology, utilizing Trello for efficient task and delivery management.
